## SKILLS

---

**Programming Languages:** C, C++, Python  
**Scripting Languages:** HTML, CSS, JavaScript  
**Frameworks:** Django, Node.js, Express.js  
**Database:** SQLite, PostgreSQL

## TOOLS

---

**Tools:** Postman, Visual Studio Code, PgAdmin4

## EXPERIENCE

---

|                                                                                                                                                                                                                                                                                                                   |                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Software Developer — Genesis IT Solutions</b><br>Worked on full-stack development using React, Python, Django, and SQL. Built reusable UI components, developed REST APIs, implemented database schemas, and optimized SQL queries. Collaborated in Agile teams to deliver scalable and maintainable features. | 08/2025 – Present |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|

## PROJECTS

---

|                                                                                                                                                                                                                                                                                                                                                                                                               |                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Loan Hub (Django, Python, SQLite3)</b> <ul style="list-style-type: none"><li>Developed a web-based loan management system with customer profiles, loan tracking, and payment schedules using Django and SQLite3.</li><li>Built backend functionality for managing loans, customers, and transactions with Python.</li><li>Implemented intuitive templates and views for smooth user interaction.</li></ul> | 06/2025 – 07/2025 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|

|                                                                                                                                                                                                                                                                                                                                                                                                                                  |                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Multimodal Data Processing System</b> <ul style="list-style-type: none"><li>Engineered a system capable of extracting and processing multimodal inputs including PDF, DOCX, PPTX, MD, and TXT files.</li><li>Implemented core logic to handle complex natural-language user queries on processed data.</li><li>Integrated the Gemini (Free) LLM with a knowledge base to deliver accurate, context-aware responses.</li></ul> | 05/2025 – 07/2025 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|

**CERTIFICATES**

---

|                                                                                                 |                   |
|-------------------------------------------------------------------------------------------------|-------------------|
| <b>Harvard — CS50x: Introduction to Computer Science</b>                                        | 10/2023 – 01/2024 |
| <b>Udemy — C++ Certification</b>                                                                | 05/2023 – 07/2023 |
| <b>Salesforce AI Associate</b>                                                                  | 09/2024 – 12/2024 |
| Earned the certification demonstrating proficiency in integrating AI into Salesforce solutions. |                   |
